

Mobile

The screenshot shows a mobile website interface for "credit-cards-online". At the top, there is a header with the site name and a hamburger menu icon. Below the header is a search form titled "Подбор карты по параметрам". The form includes several sections: "Выберите тип карты" (a dropdown menu), "Кредитный лимит:" (a section with four radio button options: "От 0 до 300 тысяч", "От 300 до 700 тысяч", "От 700 до 1 млн.", and "Выше 1 млн."), "Льготный период, дней:" (a dropdown menu with "Любой" selected), "Платежная система:" (a section with three radio button options: "Mastercard", "МИР", and "Visa"), "Документы:" (a dropdown menu with a question mark icon), "Класс карты:" (a dropdown menu), "Тип начисления:" (a dropdown menu), "Возможности карты:" (a dropdown menu), and "Преимущества карты:" (a dropdown menu). At the bottom of the form are two buttons: "Поиск" and "Очистить".

! Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- https://credit-cards-online.info/engine/lazydev/dle_filter/lib/dle_filter.js.php (expiration not specified)
- <https://mc.yandex.ru/metrika/advert.gif> (60 minutes)
- <https://mc.yandex.ru/metrika/watch.js> (60 minutes)
- <https://top-fwz1.mail.ru/js/code.js> (2 hours)

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 371B (13% reduction).

- Minifying https://credit-cards-online.info/engine/lazydev/dle_filter/lib/dle_filter.js.php could save 371B (13% reduction) after compression.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Optimize CSS Delivery](#) of the following:

- <https://credit-cards-online.info/engine/classes/min/index.php?f=/templates/smartphone/style/styles.css,/templates/smartphone/style/demo.css,/templates/smartphone/style/engine.css&7>

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 10.8KiB (48% reduction).

- Compressing <https://credit-cards-online.info/uploads/files/kviku.jpg> could save 9.1KiB (62% reduction).
- Compressing <https://credit-cards-online.info/uploads/files/halva.jpg> could save 1.4KiB (26%

Mobile

reduction).

- Compressing https://credit-cards-online.info/uploads/files/travel_otk.jpg could save 379B (14% reduction).

Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

96 / 100 User Experience

Consider Fixing:

Size content to viewport

The page content is too wide for the viewport, forcing the user to scroll horizontally. [Size the page content to the viewport](#) to provide a better user experience.

The page content is 413 CSS pixels wide, but the viewport is only 412 CSS pixels wide. The following elements fall outside the viewport:

- The element `<li class="menu-d">© 2014 - 2020...ds-online.info` falls outside the viewport.
- The element `<li class="menu-d">Вся информация...а обязательна.` falls outside the viewport.

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<label for="w0">От 0 до 300 тысяч</label>` and 6 others are close to other tap targets final.
- The tap target `<li class="nadz">Документы:` is close to 1 other tap targets final.
- The tap target `<li class="nadz">Документы:` is close to 1 other tap targets final.
